LOSS OF THE CORN CROP DOES NOT

Some Facts Regarding the Relations of the Big Four to the Vanderbilt System of Railways.

AFFECT RAILWAY EARNINGS.

One of the surprising features with railroads in the Central Traffic Association is that earnings are so little affected by the light corn crop of 1901. Such a loss a few years ago would have put many of the roads into bankruptcy, while now they are highly satisfactory earnings of last year. Official statements show that in January there were only 11,000,000 bushels of grain handled at Chicago, against 22,000,000 last year, the falling off being chiefly in corn. Traffic officials had looked for decreased earnings, and the most enthusiastic had not the courage to predict that it would make no difference in earnings, which shows the highly prosperous condition of the country. Farmers have enjoyed a men, and a portion of them are working series of most prosperous years, high prices for all the products they raise having precattle, horses, lumber and fruits, and the lot of the farmer is an enviable one at present. Financially he is about as well off, as a rule, as if he had raised a good corn crop, as his wheat crop and other grains aside from corn were abundant and sold at such high prices that, with the corn left over from 1900, there is little room for complaint. So far as the railroads are concerned, present prospects justify a belief that present earnings will continue with the marked im- | clerk of Passenger Traffic Manager Nicholprovement in general business.
